

Recycling unsealed roads to reduce dust & maintenance using insitu stabilisation

Site directions for Woodlands Road, Wombat (NSW)

The following site directions are for those travelling from the town of Wombat, about 21 km north west of Harden. The site is approximately 2 kms east of Wombat and it takes about 3 minutes to drive to the site. The site is also accessible from Young by travelling south on the Olympic Highway to Wombat. This trial is within the Shire of Harden, South West NSW.

From Harden travel west on Burley Griffith Way and turn right into Wombat Road. Travel to Wombat on the sealed road for some 15 km. Just before you reach the township of Wombat turn right into Gladstone Road (map below labelled Kingsvale Road) and drive for 1.4km on an unsealed road to the start of the Woodlands Road trial site. The site starts at the intersection and the stabilised trial is 1.2 km long followed by the control section. The GPS coordinates are 34.42062, 145.25797 (WGS84).
