About AustStab

Advancing Sustainable Pavement Infrastructure

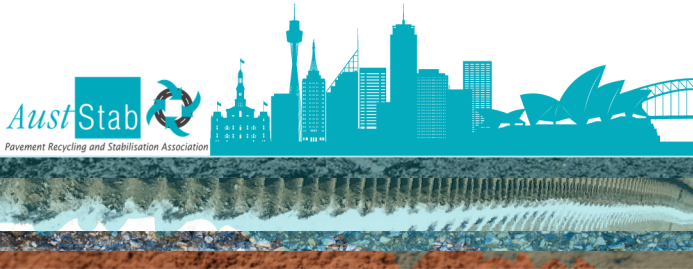

The Australian Pavement Recycling and Stabilisation Association (AustStab) is the national industry body representing organisations involved in pavement recycling, stabilisation and rehabilitation across Australia.

For more than 30 years, AustStab has worked with industry, government and research partners to advance sustainable infrastructure practices that deliver:

- Improved pavement performance
- Reduced construction costs
- Lower carbon outcomes
- Increased resilience across Australia's transport network

Through **research, training, advocacy and industry collaboration**, AustStab supports the development of smarter infrastructure solutions for Australia's roads and transport systems.

About the Conference

Australia's Leading Pavement Recycling & Stabilisation Forum

The **AustStab National Conference** is Australia's leading event dedicated to pavement recycling, rehabilitation and stabilisation.

The conference brings together **industry leaders, infrastructure owners, engineers and innovators** to explore emerging technologies, best practice and future opportunities in road construction and asset management.

Expected Attendance

Delegates typically include:

- State Road Authorities
- Local Government asset managers
- Consulting engineers
- Road construction contractors
- Materials suppliers
- Equipment manufacturers
- Research organisations and universities

Expected Attendance

150 – 200 infrastructure professionals

Why Sponsor AustStab 2026 Conference

Connect with Australia's Infrastructure Decision Makers

The AustStab Conference provides a unique opportunity to connect with decision makers responsible for designing, specifying and delivering Australia's road infrastructure.

Sponsors gain the opportunity to:

Showcase Industry Leadership

Position your organisation at the forefront of sustainable infrastructure and innovation.

Engage Decision Makers

Direct access to engineers, contractors and government agencies responsible for major road projects.

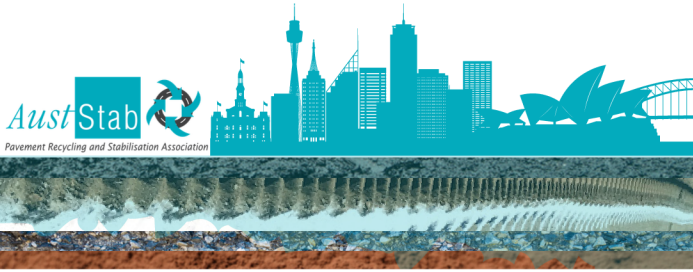

Strengthen Industry Relationships

Build valuable connections across government, consulting and contracting sectors.

Support Industry Advancement

Demonstrate your organisation's commitment to advancing resilient and sustainable infrastructure practices.

Supporting Industry & Government Collaboration

Australia's road network is one of the nation's most valuable infrastructure assets.

Ensuring its long-term performance requires strong collaboration between **government, industry and research organisations.**

The AustStab Conference provides a forum where these groups can:

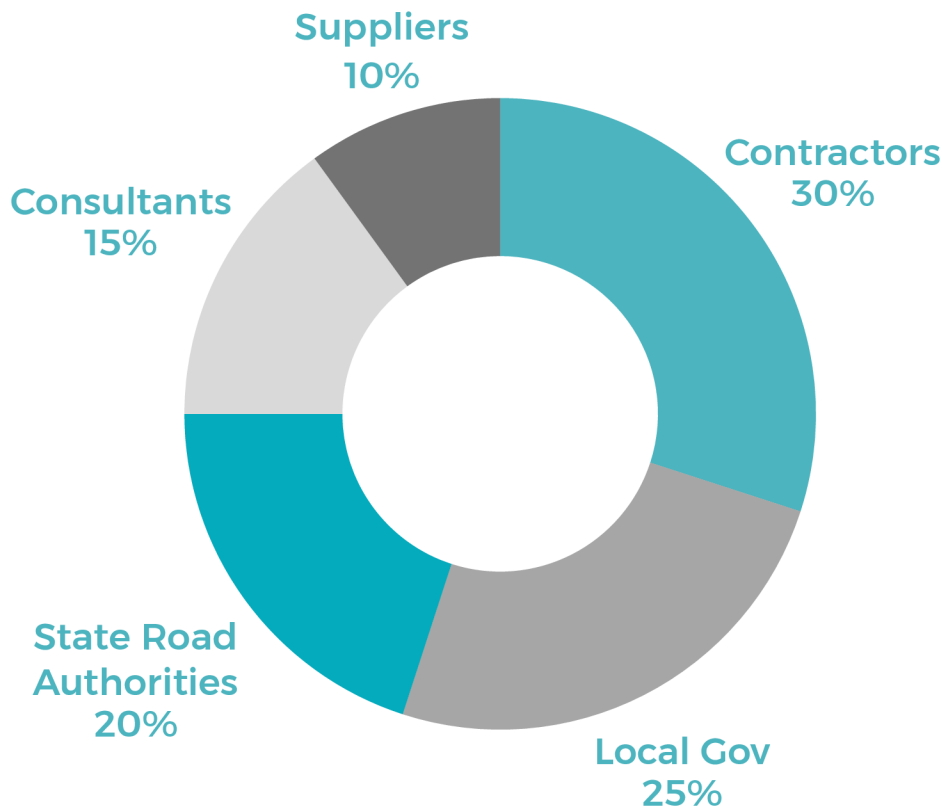

- Share knowledge and practical experience
- Explore new technologies and construction techniques
- Improve collaboration across jurisdictions
- Advance sustainable infrastructure practices

By supporting the conference, sponsors contribute to **industry capability, innovation and collaboration** that supports the long-term resilience of Australia's road network.

Who Attends

Organisations Typically Represented

- State Road Authorities
- Local Government asset managers
- Engineering consultants
